# **GCE MARKING SCHEME**

---

**SUMMER 2016**

**INFORMATION & COMMUNICATION TECHNOLOGY**

**IT1**

**1241/01**

## **INTRODUCTION**

This marking scheme was used by WJEC for the 2016 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

Q.	Answer	Marks	AO
2.	<p><b>One mark for each specific use, advantage and disadvantage x2</b></p> <p><b>Graphical User Interface</b>  <b>1 mark Description of use</b> (<i>Must give specific use</i>)  For a primary school child using a maths program.  Setting up a profile on a games console  Customising a desktop/ application  Calling a person on a mobile phone / customising / navigating a mobile phone / tablet app.</p> <p><b>1 mark for Advantage</b>  It makes the operation of the computer as friendly as possible by using high resolution graphics and pointers, making it as intuitive for a user as possible, instead of typing in commands you enter them by pointing and clicking.  Fun to use / colourful / easy to use as do not need to know commands / easier to customise backgrounds fonts / intuitive etc</p> <p><b>1 mark for Disadvantage</b>  Have to go through a number of steps to get where you want / slows an expert user down  Needs a powerful processor  Takes up a lot of hard disk space / memory</p> <p><b>Command Line Interface</b>  <b>Use: e.g.</b></p> <ul style="list-style-type: none"> <li>• Expert using it to find information on network/system configuration</li> <li>• Writing small batch files in DOS</li> </ul> <p><b>Advantage:</b></p> <ul style="list-style-type: none"> <li>• Fast to execute (run)</li> <li>• Don't have to go through menu system/faster to enter commands (not type)</li> <li>• Needs very little overheads (memory/processor)</li> </ul> <p><b>Disadvantage:</b></p> <ul style="list-style-type: none"> <li>• Need to know the commands / need to spell commands correctly</li> <li>• Only experts are able to use them</li> <li>• A lot of typing</li> <li>• Can be frustrating for inexperienced users if they don't know the commands.</li> </ul> <p>An advantage of one cannot be awarded as a disadvantage of the other for 2 marks.</p>	<p>3</p> <p>3</p>	

Q.	Answer	Marks	AO
3.	<p><b>Any five from (have to have at least one of each for full marks)</b> Answers must be in context of an organisation</p> <p><b>Advantages</b></p> <ul style="list-style-type: none"> <li>• Messages can be sent across the world for the price of a local phone call. / if got a system cheaper than posting</li> <li>• Functions such as editing and forwarding / collaborative working</li> <li>• You can (use an address book to / group send) send the same message to several different people for the same cost <u>as one call</u> / at <u>the same time</u></li> <li>• Don't have to leave the house to send the information (teleworking) / disabled use.</li> <li>• Environmentally friendly / paperless office.</li> <li>• Global accessibility / Can pick it up anywhere / on a number of devices(if qualified.)</li> <li>• Can store a copy to have an audit trail / can keep backups</li> <li>• Easier to find a stored email than a filed letter.</li> <li>• Use of a thread / conversations</li> <li>• Gives a wider audience for advertising.</li> <li>• Can be legally binding.</li> <li>• Can copy someone into an email without other recipients seeing that you have copied them in.</li> </ul> <p><b>Disadvantages</b></p> <ul style="list-style-type: none"> <li>• You are reliant on the recipient having an email account / Users need to be computer literate. (NOT Need an internet connection)</li> <li>• There are <u>security</u> and privacy issues. Confidential mail is travelling across a very public network.</li> <li>• Junk / Spam email can clog your system</li> <li>• Damage can be caused by malware – viruses etc but NOT attached</li> <li>• Distract from work</li> <li>• Damage done by email scams / phishing</li> <li>• Inappropriate use of email e.g. bullying, unsuitable content, distributed denial of service attack.</li> </ul> <p><b>Security could be given either as an advantage or disadvantage if well argued but do not accept reverse argument for second mark</b></p>	5	

Q.	Answer	Marks	AO
4.	<p><b>1 mark for description of function and 1 mark for benefit x3</b></p> <p><b><u>Templates</u></b>            Are prewritten master slides/ layout with design and some basic information already included.</p> <p>It saves you having to create from scratch.            This could be the corporate identity making it look more professional / giving a house style / On the master slide these could be a layout with company colours and logo.</p> <p><b><u>Animated transitions</u></b>            This is when you give an entry/exit effect when you move from one slide to another e.g. such as fading.</p> <p>This could be used to keep the customer interested / fun to watch / improves the flow of the presentation.</p> <p><b><u>Data Compression</u></b>            Reducing the size of the presentation/ Storing the presentation in a format that requires less memory space than usual.</p> <p>So that it takes less time when you are transferring from branch to branch.            Faster uploading to website            Transmit the same amount of data in fewer bits</p>	<p>1</p> <p>1</p> <p>1</p> <p>1</p> <p>1</p>	
5.	<p><b>3x (1 mark for each advantage and 1 mark for each example)</b>  <b>Advantages – each point must be illustrated with a suitable example.</b></p> <p><b>Data storage capacity /</b> Able to store an enormous amount of information in a small space such as a hard drive, e.g. all the information on the pupils in a large school will fit on a hard drive compared to a huge number of filing cabinets.</p> <p><b>Accurate calculations /</b> Calculations are carried out accurately, e.g. in a payroll spreadsheet if formula and data are correct then calculations will be correct.</p> <p><b>Speed of data communications /</b> Messages sent out across the world instantaneously, e.g. an email can be sent from the UK to the USA within seconds.</p> <p><b>The ability to produce different output formats /</b> Information can be produced in tabular or graphical format, e.g. a scientist producing a report will include data in a table and to make some of them easier to understand will produce some of them as graphs. (Not mail merge)</p> <ul style="list-style-type: none"> <li>• Ease of editing, because you do not have retype the whole document (1) and suitable example for second mark <b>NOT</b> to do with handwriting. (Well qualified)</li> <li>• Easier to back up data ..... (Well qualified).</li> <li>• Allows predictive analysis / gives <i>better</i> management information</li> </ul> <p>NOT general points such as security.</p>	3x2	

Q.	Answer	Marks	AO
6.	<p><b>Definition 1 mark, name of method 1 mark, description 1 mark</b>            Verification is the use of checks to make sure data is consistent and has not been corrupted.  <b>or</b>            Verification is the checking that data has been copied accurately <u>from one medium to another</u> (entered correctly but data might not itself be correct).</p> <p><b>Proof reading / Read before you submit</b> – being asked to check what you have entered is correct before being allowed to move on, i.e. ordered the right amount of items.  <b>Double entry</b> – having to re-input your account number, email address or the password ‘when creating the account or changing a password’.</p> <p><b>Description must be sensible and relevant to online shopping and can be awarded even if name not there if it is clear which it is.</b></p>	3	
7.	<p><b>3 marks for music and 3 marks for photography. One mark for stating the actual use and then two of the extension points x2</b></p>	2x3	
	<p><b>Mp3 player / Portable music player (NOT brand name)</b>            Listen to 1000s of tracks on a small portable player            Listen to favourite music wherever they are            Record and edit sound            Can create personal playlist            If used a brand name, can still gain impact marks.</p>		
	<p><b>Music downloads</b>            Allows you to select only the tracks you want / Saves money on buying whole albums            Song information download            Can automatically group songs based on genre            Allows live streaming</p>		
	<p><b>Music composition</b>, Digital sound technology allows you to create edit and hear your own music.  <u>Hardware</u>            Using instruments such as electronic keyboards with Midi interfaces            Description of sound card technology  <u>Software</u>            Multi track sequencers            Notation software            Sound wave editing            Allows experimentation</p>		
	<p><b>Digital photography and movie making including device.</b>            Take many but only keep / print out the ones you want            Only pay/printout the better ones and saves money            Only save the ones you want so saves memory            Can digitally edit and enhance photos            Variety of ways to display/distribute/share/upload to social media e.g. online in e-books or on TV / download onto computer</p>		

Q.	Answer	Marks	AO
8. (a)	<p><b>Four marks for description of any 4 of the following methods. No mark for just naming the method. No list mark awarded.</b></p> <p><b>4 marks for the method and 6 for the advantages</b></p> <p><b>OMR</b> Teachers are given an OMR form with class lists each week and they put a black mark whether present or absent. The form is read by computer and an absent list produced. The teacher marks the reason for the absence in the correct space on the OMR form.</p> <p><b>Radio tags</b> As pupils enter a classroom the PC detects their presence from the tag and adds the information to the central register.</p> <p><b>Admin software on PC / laptop / tablet / phone</b> Teachers take the register on their machines and the information is transferred electronically to the central server.</p> <p><b>Bromcom/wireless</b> In some schools the teachers have a specialised device with a wireless link to the admin server. Teachers fill in an attendance form at the beginning of every lesson and this is wirelessly up to the office</p> <p><b>Smart cards</b> Each pupil has their own smart/swipe card which they swipe through a computer at the beginning of registration and every lesson. This data is sent to the office either by wireless or by file transfer.</p> <p><b>Biometrics (Once)</b> Each pupil as they enter the classroom they place their thumb on the fingerprint reader. This data is sent electronically to the office. (same for retina scanning).</p> <p><b>Advantages</b></p> <ul style="list-style-type: none"> <li>• Saves teachers/<u>teaching time</u></li> <li>• Improved attendance</li> <li>• Easier to spot absence patterns</li> <li>• Improved tracking of attendance cuts down internal truancy</li> <li>• Automatic SMS messages to parents</li> <li>• Automatic creation of statistics, automatic archiving /sharing of data</li> <li>• Know which pupils are in and are late</li> <li>• Know where pupils are all times if year tutor wants to see them</li> <li>• Printout report summary to check pupils % attendance</li> <li>• Multiple access points to the data</li> </ul> <p><b>Condone - marks for method specific advantages</b></p> <p><b>7-10 marks</b> Candidates give a clear, coherent answer fully and accurately describing three methods, discussing advantages and a disadvantage. They use appropriate terminology and accurate spelling, punctuation and grammar.</p> <p><b>4-6 marks</b> Candidates give brief descriptions of three methods, and give advantages and a disadvantage but responses lack clarity. There are a few errors in spelling, punctuation and grammar.</p> <p><b>1-3 marks</b> Candidates simply list methods but may not give advantages or a disadvantage, or give a brief description of one. The response lacks clarity and there are significant errors in spelling, punctuation and grammar.</p> <p><b>0 marks</b> No appropriate response.</p>	10	

Q.	Answer	Marks	AO
8. (b)	<p><b>Three advantages and one disadvantages (1 mark each), x2</b></p> <p><b><u>Distance Learning</u></b>  VLE/Videoconferencing are examples of distance learning.</p> <p><b>Advantages</b>  Don't have to be in the same location as teacher/pupils who are ill can keep up to date.  Students don't have to travel / can work at home / empowers disabled  Can access more courses / allows access to courses not taught in your school.  Classes can run with small number of pupils.  Shared expertise.  Potential cost saving to schools if well qualified.  Flexibility of time.  Schools can offer classes to other schools.  Allows collaborative working.</p> <p><b>Disadvantages</b>  Diminish literacy – texting.  Cost implication of installation.  Lack of personal support <u>close at hand</u> / <u>immediacy</u>  No peer interaction.  Pupils must be motivated to achieve their goals.  Need for equipment at home.  Broadband problems (if qualified)  Hard for a teacher to gauge pupil progress.</p> <p><b><u>CAL</u></b></p> <p><b>Advantages</b>  Pupils work at own pace.  Good for pupils with learning difficulties. (customisation)  Pupils respond better to automated feedback.  Can gauge their own progress / instant feedback / automatic marking.  Engaging screens - colour/animation/sound/video.  Automatic generation of progress reports.  Special adaptations can be built in / Can target specific areas.  Materials provided in different formats such as text, voice, video, animations.  Have flexibility as to where and when they work, at home, in car, out walking/running.  Variety of activities can motivate and maintain interest.  Can access material using different hardware e.g. laptop, mobile phone, mp3 player, tablet. (No brand names)  Available at any time.  Revisit when you need to.  Multilingual support.  Not embarrassed if you get it wrong,</p> <p><b>Disadvantages</b>  Lack of personal support (close at hand)  No peer interaction/social interaction.  Cost of software/specialist hardware.  No collaborative learning.  Hard for a teacher to gauge pupil progress.</p> <p><b>Note: same answers cannot be credited twice.</b></p>	<p>4</p> <p>4</p>	

Q.	Answer	Marks	AO
9	<p><b>1 mark for each point, max 2 for advantages and max 2 for disadvantages.</b></p> <p><b>Advantages (max 2)</b>  Only takes 1 hour to produce a 6 day forecast.  Can predict path of hurricanes, etc.  Can help farmers plan work / Local councils plan / etc.</p> <p><b>Disadvantages (max 2)</b>  160 million equations to solve – cost of buying a supercomputer.  Long range forecasts cannot be <u>100%</u> accurate in predictions.  Freak storm / unusual patterns difficult to predict.</p>	2  2	
10. (a)	<p>Two marks for each formula  No mark for naming formula up to 2 marks for description of what it Does. Purpose plus extension or purpose plus detailed description of data used gains both marks. (What and why)  A: SUM, COUNT, MAX, MIN, AVERAGE, RAND  e.g.  My Count formula on page 5, cell D24, counts the number of numbers in cell range A23 to D23 (1) It can help you work out the mean of a set of numbers by giving you the number to divide the total by (1). COUNTIF, etc.,  are also acceptable  RAND generates a random number between 0 and 1 (1) in my range, on page 10, it is used to generate the number of sales of hot cross buns in cell E25 (1).  NOTE The use of RAND to generate a unique number is incorrect  I used the SUM function (SUM C2:C24) in column C of page 3 to add up all the costs of the different items sold every week (What) to work out my total cost to help me decide if I need more staff (Why).   Must be specific and related to work in their sheet.</p>	2x2	
10. (b)	<p><b>VLOOKUP and variations</b>  I used Vlookup in cell H14 on page 10 to find the price of the product (1)  You can update a table of prices without having to rewrite formulas such as multiple IF statements. (1) Faster to automatically enter data (1)  Reduces transcription errors/data entry errors/potential errors (1),</p>	3	
10. (c)	<p><b>One mark for naming the validation technique and field up to two marks for detailed description or alternative third mark for describing the actual error message (must be customised error message to the application).</b>  e.g.  I put a range check on my hotel room number in cell A10 (1) of between 1 and 100 (1) as the hotel only has 100 rooms (1)   I used a length check on the credit card number in cell G5 (1) to set the text length to 16 characters (1) as credit card numbers all have 16 numbers as the 'long number' on the front (1)</p>	3	

Q.	Answer	Marks	AO
10. (d) (i)	<p>Two marks for description of a macro process. What and Why Must be a macro used in the candidates spreadsheet. e.g. My Print macro on page 2, defined the special print settings in the Page Setup dialog box (1) and printed the invoice (1).</p> <p>e.g My navigation macro on page 4 and where is it going to/between (1) this will make it more user friendly / to move backwards and forwards more efficiently (1)</p>	2	1 x AO2
10. (d) (ii)	<p>What and why I searched the town field for Borth on page 13 (1) as I needed to see who lived closest to the marina as an assistant hasn't turned up and I need someone to get there quickly (1)</p>	2	1 x AO2
10. (d) (iii)	<p>What and why I used a breakeven graph on page 12, in my profit loss graph,(1) this allowed me to find the number of items I had to sell before I was going to start making a profit and then target that product for promotion.(1) I used a bar chart of location of sales on page 14 (1), this allowed me to easily see the area in which we sold the least product and could target that area for promotion. <b>NOTE</b> 'A visual representation of the data' is insufficient for the mark</p>	2	1 x AO2

**MARK SCHEME - SUMMER 2016**

Q.	Answer	Marks
1.	<p><b><i>Needs of the user</i></b></p> <ul style="list-style-type: none"> <li>The novice user's priority will be <u>ease of learning/intuitive</u> (1)</li> <li>The expert user will want to get the job done in the <u>shortest</u> possible time (1)</li> </ul> <p><b><i>How these could be met (Max 3 marks)</i></b></p> <ul style="list-style-type: none"> <li>Could provide tutorials for novice users / Novices will need easy access to help</li> <li>Step by step approach / novice users should never be left wondering what to do next / wizards</li> <li>Novice users tend to stick to the mouse/touch screen / Graphical user interface (gui)</li> <li>Novice user will need clear navigation structure / colour scheme making it easier to use i.e. showing routes through a program (hyperlinks)</li> <li>Provide shortcuts for experts / command line interface</li> <li>Experts often type at high speed and can memorise key combinations/commands (1) and this is faster than using the mouse and clicking on icons or going through a series of windows</li> <li>An expert can customise the interface to suit their needs</li> <li>Increased numbers of ways of performing the same operation – interfaces have a number of routes and allow the user the choice, i.e. a novice user would prefer to use a drop down menu or click on an icon to print whilst an expert will want to use CTRL/P</li> </ul> <p><b>Must be clear that answer refers to novice or expert and not general points about HCI.</b></p>	2           3
2.	<p><b>1 mark per point (have to <u>state need</u> and how helped) to a maximum of 4 marks</b></p> <ul style="list-style-type: none"> <li>Visually impaired people can have their screens configured using large fonts.</li> <li>Magnify areas of the screen for people with poor eyesight.</li> <li>Visually impaired people can also use special Braille keyboards to enter the data and can use Braille printers to produce output which other blind people can read.</li> <li>Visual messages on screen instead of sound for the deaf.</li> <li>Use of correct colour schemes for colour blind people.</li> <li>Use large mouse or trackball for people with poor co-ordination.</li> <li>Blow pipes (sip and puff switches) or eye movements for entering text controlling devices for those who cannot use their arms, etc.</li> <li>Brainwave controlled devices for physically handicapped with no arm/hand movement.</li> </ul> <p>Condone example of not using frames or patterned backgrounds, or DDA requirements for comments attached to images for blind users Paralysis should be of upper body or total Dyslexia if well argued – colour paper plus why Other examples might be given - Accept any suitable point.</p>	4

Q.	Answer	Marks
3.	<p><b>3 x (1 mark for giving <u>each factor</u> and a 2nd mark for a fuller description)</b>            NOT size or cost to organisation</p> <p><b>How the system will be used</b></p> <ul style="list-style-type: none"> <li>• What type of <u>applications</u> do users require? / Are the users going to require a wide range of applications?</li> <li>• Will they need large <u>data storage</u>? / Are they going to store a large number of data files?</li> <li>• From <u>where</u> will they operate the network e.g. at home in office or remote access from different locations. / Where does the processing get done?</li> </ul> <p><b>Existing systems to integrate</b></p> <ul style="list-style-type: none"> <li>• More often networks are not developed from scratch but need to fit in with existing systems.</li> <li>• Sometimes an extension is required e.g. when a new branch office opens.</li> <li>• Therefore any new network must fit in with the existing operating systems and protocols.</li> <li>• It must support any peripherals already in use, e.g. bar code readers, printers, etc.</li> <li>• Can the current stock of PC's be used on the new network?</li> </ul> <p><b><u>Performance</u> in terms of: <u>reliability</u> / <u>user friendliness</u> / <u>capacity</u> / <u>speed of processing</u></b></p> <ul style="list-style-type: none"> <li>• Different parts of the organisation may have different performance requirements.</li> <li>• Real-time e-commerce system may require greater speeds / capacity / reliability.</li> </ul> <p>NOT just 'faster networks'</p> <p><b>If candidates only list factors then maximum mark is 1</b>  <b>Condone security</b> if reference to level of risk (value of data) NOT just hacking / viruses</p>	3x2

Q.	Answer	Marks
4.	<p><b>Answers must mention both ring and star topologies making relative comments for each mark. (i.e. cannot make 6 ring points)</b>  <b>No marks for the candidate using the term <u>fault tolerant</u> but can get the ring disadvantages</b></p> <p>Indicative content:  These points could be made but must be related to each topology.  ACCEPT THE OPPOSITE OF ANY OF THESE POINTS BUT NOT TWICE</p> <p><b>Advantages of ring</b></p> <ul style="list-style-type: none"> <li>• Each computer has the same access as the others so no one computer can hog the network.</li> <li>• Higher transmission speeds / Data flows in one direction only (so large volumes can be transmitted).</li> <li>• No collisions.</li> </ul> <p><b>Advantages of star</b></p> <ul style="list-style-type: none"> <li>• Load tolerant – extra computers can be added without much loss in performance because all computers have their own path to the server.</li> <li>• Easy to add extra computers – extra computers can be added without disturbing the network. #</li> <li>• Different speeds are possible on different spokes/ arms of the network.</li> </ul> <p><b>Disadvantages of ring</b></p> <ul style="list-style-type: none"> <li>• Faults are difficult to locate.</li> <li>• <u>It is impossible to keep the network running</u> whilst equipment is added or removed because there is only one path for the data to follow #.</li> <li>• Break in cable and network won't work*.</li> </ul> <p><b>Disadvantages of star</b></p> <ul style="list-style-type: none"> <li>• Higher cost – the large amount of <u>cabling</u> needed makes it more expensive.</li> <li>• Dependence on the central server/hub.</li> </ul> <p>ACCEPT THE OPPOSITE OF ANY OF THESE POINTS BUT NOT TWICE  i.e. an advantage of a ring can be a disadvantage of a star e.g. only give one of the two #  N.B. Do not accept points which are really about peer to peer or client server networks</p>	6
5.	<p><b>One mark for what it means</b>  Distributed computing - a series of computers are <u>networked</u> together / virtual supercomputer each working on solving the <u>same problem</u> / a problem / one problem (1)</p> <p><b>One mark for a basic description of an application with further mark for expansion with more detail x2</b>  <b>EXAMPLES</b></p> <p>The purpose of the SETI (<i>Search for Extraterrestrial Intelligence</i>) project is to search for intelligent life outside the Earth (1) and to do this a radio telescope is used.(1) In order to search for the narrow-bandwidth signals lots of computing power is needed. (1)</p> <p><i>Popular Power project: helping to develop flu vaccines (1)</i>  <i>Folding @home project on consoles: Alzheimers' research (1)</i>  For these other projects, second mark is for more detail.</p> <p><b>NB No mark for just naming application (i.e. just SETI)</b></p>	1  2  2

Q.	Answer	Marks
9.	<p><b>Any 6 relevant points (Possible content below)</b></p> <p>For</p> <ul style="list-style-type: none"> <li>• If someone has been wrongly accused of a crime and found not guilty, they still have to live with the stigma and search results pointing to original crime is just a reminder.</li> <li>• Should minor crimes committed as a <u>juvenile</u> haunt you for ever?/ should silly photos taken when <u>young</u> stop you getting a job/ do employers have the right to stop you doing things</li> <li>• Financial problems (declared bankrupt) which you have overcome.</li> </ul> <p>Against</p> <ul style="list-style-type: none"> <li>• Should a politician be able to erase details from his past</li> <li>• Professional aiming to hide bad reviews.</li> <li>• Society might want a true picture of the individual</li> </ul> <p>WHY</p> <ul style="list-style-type: none"> <li>• Length of time information has been there- may not be relevant</li> <li>• Not wanting others to see private data/ information posted without permission / invasion of privacy if qualified</li> <li>• Job prospects may be affected</li> <li>• Accuracy of published information- could be telling lies/social impact</li> <li>• Privacy Issues :- could lead to cyber bullying / stalking / grooming/identity theft</li> <li>• May get bad reviews/criminal case history so want it removed to disguise facts.</li> </ul> <p>CONCERNS</p> <ul style="list-style-type: none"> <li>• Worldwide so can get at it from other websites in different countries</li> <li>• Might not remove all links to it and still sits on server</li> <li>• How long does it take /how do you get it removed</li> <li>• Any costs involved</li> <li>• Censorship- companies/individuals may try to suppress/restrict access to information public has right to know/ freedom of information</li> </ul> <p>General Points</p> <ul style="list-style-type: none"> <li>• Ruling seen as a right to be forgotten</li> <li>• Came about because an individual took it to law to remove an 18 year old story about having his home repossessed due to financial difficulties. He claimed that the search results violated his privacy</li> <li>• EU citizens can ask for links to be removed if the content it directs people to is deemed "inadequate, irrelevant or no longer valid".</li> <li>• Content not deleted from the website, just the link to it, making it harder to find.</li> <li>• Case originally dismissed as requesting search engine providers to suppress legitimate and legal information that has entered the public domain as an interference of freedom of expression</li> <li>• Start of censorship in Europe.</li> <li>• "Same as going into a library and pulping books".</li> <li>• Initial flood of requests to have links removed</li> <li>• Don't have to remove link if in public interest (1), but who decides what is public interest? (1)</li> <li>• Whole system tied up in red tape.</li> <li>• Publicising address and robberies occurring</li> </ul> <p>Any reasonable answer</p>	6

Q.	Answer	Marks
10.	<b>(Item 1 mark and problem 1 mark) x3</b> <b>NB candidates can mix and match the problem answers but do not award duplicates but if no example cannot award problem.</b>	3x2
	<b>Example</b>	<b>Problem</b>
	<b>Responsibilities</b> of the employee to abide by company rules	Don't take laptops on trains and lose them/play games  By logging off workstation  in company time/ personal use of email/misuse of company printers/misuse of company mobile phones
	<b>Respecting rights of others</b>	No cyberbullying or abusive emails
	<b>Abiding by current legislation</b>	e.g. Data Protection Act, Equal Opportunities Act, Computer Misuse Act, Copyright Act etc. - <i>don't sell confidential information about customers on to rivals</i>
	<b>Authorisation and permissions on data access:</b>	What the employee can and can't do to data
	<b>Security of data</b>	Don't disclose passwords, personal use of email logging on and off procedures, encryption of transferred data etc.
	<b>Protecting hardware and software from malicious damage</b>	By logging off workstation and locking doors/ not downloading viruses
	<b>Complying with licensing agreements</b>	Don't copy software onto home computers/ keep to correct No of copies
11.	<p><b>One mark for each factor and one for each further explanation x 3</b> <b>Context must relate to a Financial company or be neutral</b></p> <p><b>Likelihood of risk occurring</b> - some things such as power cut are inevitable but explosions much less likely - senior managers have to assess the likelihood of each risk occurring and put in the necessary security</p> <p><b>Short and long term consequences of threat</b> - resources (staff, equipment, etc) need to be directed towards recovering the data / may have to pay compensation / financial loss due to loss of business through not being able to sell mortgages, loans etc. / embarrassment/ prosecution / loss of integrity / bankruptcy / cost of replacing equipment</p> <p><b>How well equipped is the company to deal with the threat</b> (What procedures are in place) - has to be reviewed periodically because of changing needs - disaster recovery programme - backup strategy - cost (how much they are prepared to spend), use of firewalls - use of anti virus</p> <p><b>NB Should not be talking about Health &amp; Safety</b></p>	3x2

Q.	Answer	Marks
13.	<p><b>6-8 marks</b> Candidates give a clear, coherent answer fully and accurately describing four features or processes. They use appropriate terminology and accurate spelling, punctuation and grammar.</p> <p><b>3-5 marks</b> Candidates briefly describe features or processes, but responses lack clarity. There are a few errors in spelling, punctuation and grammar.</p> <p><b>1-2 marks</b> Candidates simply list a few features or processes or give a brief description of one. The response lacks clarity and there are significant errors in spelling, punctuation and grammar.</p> <p><b>0 marks</b> No appropriate response.</p> <p><b>Indicative content</b> features/processes (4x1), further detail/expansion (4x1)</p> <ul style="list-style-type: none"> <li>• <b>Creating the design specification for software</b></li> <li>• <b>Design of processes</b> – queries, macros, calculations, validations</li> <li>• <b>Design of output</b> - reports / specialist documents such as invoices, payslips, etc.</li> <li>• <b>Design of data and file structures</b> that will allow a useable system to be built. This will include the design of fields and table structure for a relational database.</li> <li>• <b>Design of information systems</b> that will allow users to get relevant information out of the system, which will allow them to make appropriate decisions. (DFD's / ERD's)</li> <li>• <b>Design of networks and transmission issues</b> such as topology, type of cable, protocols, etc.</li> <li>• <b>Personnel issues.</b> Staff will need training and departments reorganising, skill level of the user</li> <li>• <b>Security processes and procedures</b> i.e. registering with the Information Commissioner, where data is stored, access levels, design of backup procedures, etc.</li> <li>• <b>Design of House style/ethos</b></li> </ul> <p><b>Can still get example mark if factor not there.</b></p>	4x2

Q.	Answer	Marks
14.	<p data-bbox="288 241 1038 275"><b>(1 mark for fear and 1 mark for explanation of why) x4</b></p> <ul style="list-style-type: none"> <li data-bbox="288 311 1276 412">• <b>Fears of redundancy with lost jobs.</b> Less staff are often needed to do the same amount of work once computers are introduced. / New system may replace staff who performed manual processes e.g. filing, etc.</li> <li data-bbox="288 448 1276 510">• <b>Change in work patterns</b> - split shifts or change of hours or night work, 24/7.</li> <li data-bbox="288 546 1276 719">• <b>Fear of reduction in status and job satisfaction.</b> Management Information systems means less middle managers are needed so departmental heads may lose power./ Data warehousing means all data is stored centrally and is available to all some departments who used to be asked for the information are downgraded in status.</li> <li data-bbox="288 754 1166 817">• <b>Change in internal procedures</b> - may make staff take on extra responsibilities for no extra money.</li> <li data-bbox="288 853 1276 954">• <b>Fear of Retraining/Fear of looking ridiculous.</b> Established staff members may feel their lack of ICT skill and knowledge may make them look incompetent.</li> <li data-bbox="288 990 1276 1227">• <b>Changes in location/Organisational structure.</b> Office space requirements are reduced so need smaller premises with reductions in rents, rates, utility bills. /New premises may not be in original location causing problems with journeys to work. / Sometimes they are relocated to different cities which could lead to either loss of job or relocation expenses. E.g. some jobs may go abroad to call centres /breaking down friendship groups.</li> <li data-bbox="288 1263 1276 1326">• <b>Fear of Health risks</b> from working more with computers, back problems etc.</li> </ul>	4x2

Q.	Answer	Marks
15	<p><b>2 out of the following covered. Mark comes from example and only one from each category</b></p> <p><b>BACKUPS</b></p> <ul style="list-style-type: none"> <li>• Onto external devices DVD/USB etc</li> <li>• RAID</li> <li>• Offsite</li> <li>• GFS for batch processing</li> <li>• Safe storage of important files stored on removable discs e.g. locked away in a fireproof and waterproof safe</li> <li>• Disc portioning</li> </ul> <p><b>ACCESS RIGHTS TO CHANGE DATA</b></p> <ul style="list-style-type: none"> <li>• Read only/write protect</li> </ul> <p><b>CHECKS ON TRANSMITTED DATA</b></p> <ul style="list-style-type: none"> <li>• Check bits/parity checks</li> <li>• Description of odd or even parity</li> <li>• A common type of error that occurs during data transmission is that a bit is swapped from a 0 to a 1 or a 1 to a 0 by electrical interference. Parity checks this type of error.</li> <li>• If total of 0's and 1's on transmitted and received data does not match then an error must have occurred. A request will be sent to the transmitter to ask it to send the byte again.</li> </ul> <p><b>DON'T OPEN UNKNOWN EMAILS</b></p> <ul style="list-style-type: none"> <li>• Could contain malware</li> </ul> <p><b>TRAINING</b></p> <ul style="list-style-type: none"> <li>• To use correct procedures and make less mistakes</li> </ul> <p><b>ADVANCED VERSION FEATURES AND TRACKED CHANGES FEATURES ON WORDPROCESSORS</b></p> <ul style="list-style-type: none"> <li>• Avoid losing data by accidentally deleting data and saving it.</li> <li>• After the document is saved, the portions that are changed or deleted are lost unless you've enabled features that will store changes for you.</li> </ul> <p><b>PROTECT AGAINST POWER SURGES WITH AN UPS</b></p> <ul style="list-style-type: none"> <li>• An un-interruptible power supply protects your computer and data during a power failure.</li> <li>• The spare battery in the ups gives you ample time to save your documents and shut down windows properly so that you will not lose any files or damage any hardware components.</li> </ul>	2

Q.	Answer	Marks
17.	<p><b>1 mark for each explanation</b></p> <p><b>Entity</b> – an object of the real world that is relevant to an ICT system e.g. a place, object, person, customer, product, etc</p> <p><b>Attribute</b> -- a single item of data which represents a fact about an entity.</p> <p><b>Relationship</b> – the way in which entities/tables in a system are related / connected/ linked to each other.</p> <p><b>(Explanations need to just convey these meanings and not be literal)</b></p>	<p>1</p> <p>1</p> <p>1</p>
18.	<p>Example of possible tables</p> <p>PATIENT (<u>Patientid</u>, surname, phone, DOB, Wardid#, Physioid#)</p> <p>PHYSIOTHERAPIST (<u>Physioid</u>, surname, phone, etc)</p> <p>Underline = primary, # = foreign</p> <p><b>1 mark per table name</b></p> <p><b>1 mark per foreign key</b></p> <p><b>1 mark per primary key</b></p> <p><b>1 mark for 2 extra fields in each table (can be the same)</b></p> <p>If Wardid is duplicated then no mark for that key. NB No mark for a primary or foreign key which is not labelled.</p>	7

Q.	Answer	Marks
19	<p><b>Description of any four of the following with an example/extension 4x2</b>  <b>First mark is for term in bold</b></p> <p><b>If the term isn't fully there do not penalise if description is right</b></p> <p><b>(Security) Hierarchy of passwords</b> limits users to various parts of the program.(1) A receptionist would only have access to basic customer details whilst a manager would see all information on the customer account.(1)</p> <p><b>(Security) Access rights</b> to parts of the program only certain users can access and change data.(1) A clerk would see all the information on a customer account but be unable to alter the hire rate details whilst a manager could.(1)</p> <p><b>Consistency</b> - Data consistency is the relationship between the input data, the processed data and the output data as well as other related data.(1) If the system is working properly the data will be correct at each stage and is said to be consistent.(1)  OR  Data consistency is using one file to hold a central pool of data. / A company may hold all its customer data in one file. (1) This avoids the need to input data twice so that if data is changed in one file it won't need to be changed in another and remains consistent.(1)  OR  Data being inconsistent in a flat file due to possibility of different formats etc.(1) and being consistent in a RDBMS as each record is only stored once so cannot have different attributes(1)</p> <p><b>Redundancy</b> Data redundancy is where you store an item of data more than once / A company may hold its data in different files.(1) This is wasteful because some data may need to be input twice and if data is changed in one it will need to be changed in the other. / Data which is repeated unnecessarily is called redundant data.(1)</p> <p><b>Independence</b> Data independence – the data and the applications/programs used to access it are independent/separate.(1) New applications can be developed to access the data without changing the data / New systems can still use existing data. <b>(1)</b></p> <p><b>Integrity</b> – Less chance of errors in data (1) as data only appears once in database (1)</p>	<u>4x2</u>
